The first release of Adobe Sensei Catalyst, which was introduced in Avanquest 2017, enables Photoshop to leverage the benefits of AI and deep learning to deliver new features and improvements. With Phase 1, Adobe Sensei AI-powered features debut in Photoshop, including image recognition, object and content detection, content-aware tools, intelligent enhancements, and content-aware modes. Adobe Sensei AI technology is used across all of Adobe's marketing, video, creative, desktop and mobile applications.
